

# VOLITION CULT

*"When people are pure, laws are useless; when people are corrupt, laws are broken. We have but one aim; to eradicate the corrupt from New Eden. The Volition Cult has chosen purity. The only choice you need to make is whether to stand with us, or against us."*

**Voice of VOLT Public Newspaper: Issue 11, May 2010**

---

## **Editorial**

Firstly welcome to another edition of the Voice of Volt. This is your opportunity to learn a bit more about '[The Volition Cult](#)', the new changes in Eve and Volt's place within.

And secondly, a very warm welcome from current Volition Cult members to the following and newly joined corporations:

**Occam's Razor**

**Black Revelation**

**Cows Boys from HeII**

**Gangrel Mining and Security (Soon to change)!**

**Liberty Storm**

**Pator Tech Shipyards**

**Phi Star Unity**

This month we have several items that will entertain you:

- Voice of Volt - Design Competition
- Ship Reviews - Mega and Harbinger
- A ship workers perspective of Eve - A fictional account
- Word Search - Alloys
- Comic Strip
- Interview
- After Action Report (AAR)
- Empire War - PVTR, SMASH & GRAB

Enjoy!

## **Newspaper Logo/Header Competition!!!**

With the new name of the newspaper and the transition from newsletter to newspaper, we feel that it is also time to perhaps change the current logo and header. And as no one on the current newspaper team is particularly artistically gifted, we need help from you!

So for the next month we will be hosting a small (perhaps large?) competition where you the reader can participate (also open for non VOLT members) by submitting an image file of just how you would like the new logo/header to look like. If you win you will get to see your logo/header featured in the forthcoming issues of the newspaper and get the Prize!

The winner will receive 50 mill isk!

That was the easy part, now here come the requirements, the logo/header must:

- Have the line "Voice of VOLT, Public Newspaper: Issue X, Month Year" in it
- Use the Volition Cult Alliance logo
- Fit on a standard page (A4) / basically the same size as the one we have now
- The use of "VoV" is optional, but is good inspiration

When you are ready send your suggestion to me ([schelikhill@gmail.com](mailto:schelikhill@gmail.com)) and we will gather them all up and vote on them.

When we have a winner, we will present you the reader, with all of them and of course announce the winner!

One final note: the newspaper is like a baby for several of the newspaper team's participants, therefore we must reserve the right to say no to all logo/headers entered. Basically if we believe that we do not have enough to choose from, we will not change the logo/header this time around.

Now go be artistic!

## **Volition Cult Decorations & Awards**

### **The Defender of Volition**

Our monthly decoration for those individuals who have achieved the most kills each month. In the Volition Cult Alliance, getting this award can be easy and hard all in one. Some months are few on kills, while others make one happy that graveyards are not needed in EVE.

The text of *the Defender of Volition* reads:

'Defender of Volition is only awarded to the top fighter of each month. Thereby this decoration are given to those who have excelled above their peers.'

Volition Cult Alliance salutes this bearer!!

*(A minimum of 20 kills are required)*

For your awesomeness at killing, the Volition Cult Alliance Hails you!

**The Defender of Volition for April is:**

# **Rhinanna**

Rhinanna has successfully broken the trend of Cuffdawg winning the award -  
Congratulations!

## **Volition Cult Academy Awards**

The lessons and exams are available within the Volition Cult forums at the [VC Academy](#); once you have listened to the lessons, complete the questionnaire and submit for review.

The recordings cover a large number of subjects with the aim of providing information useful for new pilots to get into PvP as well as old pilots to pick up on a few tips they might not know.

### **Basic Exam**

The following members took and passed the basic exam in April 2010:

geophagus  
Maxuud  
Aardvaak  
Mr Diesel  
Montie Mole

### **Standard Exam**

The following members took and passed the standard exam in April 2010:

Vernn Miller  
Mr Diesel

### **Record**

To date, 49 people have taken the Basic Exam with 48 Passes, 1 Fail.  
To date, 27 people have taken the Standard Exam with 25 Passes, 2 Fails.

*Congratulations to all those successful!*

## GoSH

The main purpose for GoSH is to aid with managing the corporation members of the alliance. We are growing and as we are growing we are needing more time to register our members. GoSH also uses the Limited API to keep an eye on members to see if they have gone inactive, left a Volt corporation or haven't paid a subscription.

GoSH can give corporation directors a complete overview of all their registered members and their account status. GoSH also handles our authentication on the forums. It streamlines our ability to get new recruits integrated into all that forum chatter that goes on behind the scenes. It lets members post on the killboard and it gives access to our event calendars.

What are you waiting for ! If you're in the Volition Cult Alliance and are not yet signed up through GoSH, please do !

## Current Progress

The [GOSH](#) tool development has progressed well in the last month,

If you wish to learn more, review the forum topic [GOSH in Volt Forum](#) (Alliance members only) or contact 'J Nx' in game. For new members to the Volition Cult Alliance, to get access to our website please read [J nx's post on how to register with GoSH](#).

## Volition Comic strip

A brave Volt pilot 'Creye' has started to produce some comic strip style jokes, here are those found most humorous of those produced so far:

**«Other than that I am a pretty basic dude.»**

*An interview with C.Y.B cuffdawg, by Cind Moltarr*

**This afternoon I had a special date with one of our greatest PVPers in the alliance. But he does not only PVP, he is also one of our best allrounders in the game: cuffdawg. Let's see what insights he has to offer to us.**

**Cuff, you are famous for your pvping skills. How did you become such a great PVPPer?**

Well, wasn't always great but I always had spirit. I think that is the key to any good success. [I was] also taking on-board what more experienced pvppers had to say in my younger days.

**So you also started young and maybe green behind your ears. How did you even get into EVE?**

Haha, dunno about young but umm, yer through a mate that doesn't play anymore. [He] dragged myself, Harry and some other real life friends into the game but some have left and you know which of us remain.

**Aye, there are Thorn and Beau which come to my mind. And all of you are in CyberShield. How is it to be in one corp and to know each other in real life?**

Well Thorn isn't in CyberShield but aye he is almost Aussie. Beau, I don't know in rl. We are just 2 Aussie that play the game. Harry, I meet in real life through a guy call Bodie :P

**Hah, you got me there. I mixed up all names!**

Haha, I guess you own me a drink.. of Quafe

**Doh. Let's quickly go to the next question : ) You said you are from Australia. Can you tell a little bit more about yourself?**

Well like most Aussies I am loud, I swear, and I like to leave an impression.

**Damn, yes you do this.**

Other than that I am a pretty basic dude. I am able to play EVE a lot because I have no job due to an injury. With any good luck I may get my fair share.  
Y thank you Cind.

**With playing EVE a lot, you tapped in almost every corner of the game already - thinking about your other yous - what do you think makes EVE special, or different from other games?**

One of its selling points is, it's one sever. And the design which all users around the world can play the game. Yet it's not overly lagged nor unstable, giving more time to play my game. Also the time skill factors and age isn't everything in this game - it just helps lot :P

**One world in one universe!**

Hehe :P

**And not only in the EVE universe but also in VOLT. What did you think, when you started to meet people from around the globe? Do we rather clash or inspire ourselves?**

I think, we all have our own styles and understands. In saying that, I think, we all misunderstand English sometimes. As one person may say something that may mean something different to the other - yet not be wrong due to words having more than one meaning. So sometimes we have great moments of love, others of hate - just like a family you can say. I also hope to see us work more together, to achieve more as a team than less as an individual.

**A nice sum-up there. Now let's look on your career again. Can you give us some facts, like your favorite ship, your next goals in EVE?**

Well favorite ships... I don't have any as I love them all - as they all have a job to do and it's to kill the enemies. Goals, well I have some high-end goals atm. One is to gain enough fire power to, one day, take our own space :P

**A pilot you truly look up to?**

Umm gee, I have to say I have no role model :/  
If anyone, maybe Iron Maiden.

**Your biggest «ouch»-moment in EVE?**

Ummm, got hot dropped by a mothership/super carrier just for my Raven.

**Hehe, yummy! And your moment of greatest glory so far?**

I think when I double bubbled the M-O mining op. 11 Hulks and a Domi. The only bit I did fail on, was no fraps.

**A moment of true glory that was indeed.**

Hehe it made my day :P

**Now that we are almost at the end of the interview, one last question: What would you advise to a new player, if he wants to get into PVP?**

Fit a point/scambler, MWD and have your overview settings good to go. And to not take offence to my style of leading a gang, because I like to do things right when I fight in EVE :P

**Hehe. Any last shout-outs to the public?**

Let get VOLT to where it should be...

**Let's hope, we get it going that way. Many thanks to you for the interview!**

Thank you also and have a nice day.

## **Tyrannis - New Patch to EVE**

### [Tyrannis Features Website](#)

Tyrannis expands the universe of EVE Online in ways never before imaginable. Within New Eden, pilots will now be able to descend to planets, construct colonies and harvest their hidden treasures. Beyond New Eden lies EVE Gate, a central portal for the EVE community to interact, organize and communicate even when they are not in game. Tyrannis introduces new platforms and new technology, setting the stage for even bigger things to come.

The claws of industry have reached in every direction and for far too long the planets have escaped their grasp. No longer. The ability to harvest the lucrative resources that EVE Online's planets have to offer is now yours, giving fuel to the aspirations of industrialists and combat pilots alike. [Planetary Interaction - Overview](#)

Interact with contacts and manage characters from virtually any computer with an internet connection! EVE Gate is a web-based collaboration and networking portal that allows players of EVE Online to engage in communication, management and social activities even when they are not in game. [EVE Gate - Overview](#).

The Tyrannis Patch will also provide [other features](#) to improve our EVE experience, graphic upgrades and Event Landmarks.

Trust that VOLT members are following all news on this coming expansion. In particular, the planetary interaction but our eyes have also lit up seeing the new and exciting changes to insurances...T2 ships with insurance that is actually worth something!

## **VOLT UK Meet in May**

**When:** Friday, 30th April to Monday, 3rd May 2010

**Where:** Sale, Manchester, United Kingdom

On Friday, 30th April to Monday, 3rd May 2010 we had several Volt members meet in Manchester. [Mt Snowdon](#) on the Saturday.

Friday 30th evening. The [Vagabond](#) piloted by Keela Danne, carrying Luth Curmal and Agent Stone, made it to Handerson Station at 7.15pm, after a trip up the pipe (M5 and M6) with some frustration along the way due to a few cases of Traffic Advisory slowing us down. We are on the scout list for 3 Vehicle Killmails !

Now looking forward to meeting up with the rest of the guys for the trip up the mountain tomorrow.

**Update 1** - Saturday 1st May - 0600 Luth awakes and checks weather - Predicted 10 deg C and partially cloudy. 0605 Grumpy Keela upon being woken early throws small, hard, pointy edged object (imaginary) at Luth, hits him in forehead. Very satisfying.

0720 Stone's first aid kit is used before we set out, applying a last minute armour repair.

No Volt flag but we have a Volition Cult T-shirt being sported by Agent Stone, Luth with his Gallente Federation colours with Keela planning to go up in a "Failure Is Not An Option" top.

**Update 2** - We succeeded in climbing Mt Snowdon. No injuries, bit damp!

**Update 3** - Back at Handerson Station :

Now back at Handerson Station awaiting Kebabs and Currys, while hoping that abused muscles and bones stay intact.

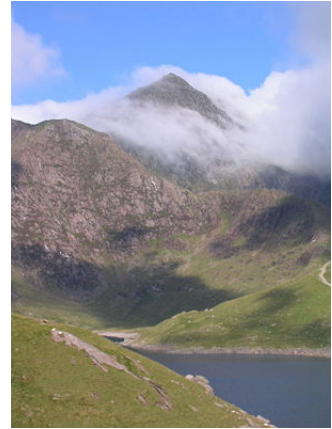

We'll also be going for a Luth Curmal podkilling due to a "short cut".

### [Route on the way up](#)

To quote one of the young ladies who made the climb with us : "To go back that way is Death". So we thought about getting the train back, stuck our tongues out at the prospect of £18 a head to get the train back. There were also some extremely achey muscles (*Keela-ed: calf muscle hasn't exploded yet ...*)

Went back an easier way (well, it started easier!), which turned into [a rather long shortcut](#) ... (*Keela-ed: The Evil Overlord Editor is complaining ... to be fair, although the shortcut involved a swim for one of us, the distance was about the same and we avoided dodging cars !*)

Challenge achieved ! What's next ?

## **Volition Cult Alliance Store**

### **Show your friends how much you support the Volition Cult !**

**Agent Stone** some time ago kindly set up a store with Spreadshirt.net where you can grab your very own T-Shirt or Mug. Accessible at: [The Volition Cult T-shirts](#).

Here's a link to the forum thread about [The Volition Cult Merchandise Forum Topic](#).

### **Merchandise Store Update!**

We don't have a US store arrangement - however if there is sufficient demand we will see what we can do.

We have a brand new item just in!

We proudly announce The Volition Cult teddy bear! He will conquer you with his fitted softness and teddy bear eyes that melts even the proudest of heart.

As Hill says, "GIMME GIMME GIMME".

## **Volition Cult Industrial Information**

Firstly, the management of clones again rears its head above the grime of 'on-going' issues for capsuleers in VOLT - Please read and enjoy this guide to [Cloning](#)

Secondly, the Volition Cult HIGH COMMAND can proudly announce that the VBPT-T Industrial Index reached level 5 this month with the appropriate Industrial Upgrade installed in the Infrastructure Hub.

This is a phenomenal feat to reach for a relatively small alliance that is going through significant changes as well as a significant process of corporation recruitment.

**Congratulations to all those involved!**

## **AARs -**

### **An Unplanned Capital HOT DROP - Creator Luth Curmal**

*(Keela&Hill-ed: names nerfed to protect the crafty!)*

Carrier pilots undocked in Insmother space, completed uneventful jumps until 1 jump from Faswiba.

*Able* was in Faswiba area during our jumps and informed us some 'Gatlin Penguins' & friends where in the area. *Able* commenced scouting gates and stations. A pilot was in Faswiba, confirming IX-8 station movements.

So prior to final jump - Carrier fleet organised itself for an 'On Station' fight:

1. Sorting its 'add pilots' to watch list
2. Refitting for PVP
3. Squad organisation & bonuses

*Baker* organised himself and a ship:

1. Fitted with a cynosural field generator,
2. Large armour buffer,
3. Multiple warp scrambling/warp disruption modules.

When everyone ready *Baker* undocked.

Watched a few hostiles dock/undock - warp away return dock/undock etc. Harbinger, Absolution, Hurricane on directional scan from the station.

With no aggression made, we assumed the hostiles did not want to fight at the station, under the gaze of sentry guns etc. *Able* and *CynoCharlie* logged off, to give the hostiles a sense of safety 😊

FC requested BS warp to a belt but after a bit of time there was no aggression; FC requested BS warp to another belt.

*Baker* reported that a Hurricane and Absolution had warped into his belt location - at 100km off; confirmed that they had approached and then aggressed. *Baker* confirmed the Absolution was warp scrambled.

FC called for *Baker* to activate cynosural field generator.

FC called for carrier pilots to jump to *Baker*, Primary target Absolution.

3 Carriers instantaneously arrived at the cyno field, they commenced locking *Baker* and the Primary target. *Baker* successfully repaired when at 80-90% of armour remaining.

The primary target - well kb says it all. Destroyed efficiently by fighter drones 🤖🤖🤖 .  
[http://www.eve-volt.net/kb/?a=kill\\_detail&kill\\_id=7911](http://www.eve-volt.net/kb/?a=kill_detail&kill_id=7911)

*Able* logged in once FC commanded cyno field activated, undocked and warped to assist, but too late - the Carrier weapons were too effective.

A hurricane not warp scrambled at the initial aggression fled and returned soon after the Absolution was destroyed. He was locked at range (About 70km) fighters released to fight, he again fled - he was into his Armour tank.

Carrier pilots commenced to align for Faswiba IX-8 station, ensuring asteroids evaded and our cyno supplying ship still in range.

The hurricane again returned to the belt, with an Anathema. They were both ignored.

Once cyno field down, all pilots warped to the IX-8 station and docked.

Well done all 🧑🏻‍🚀

## Ship Reviews

### Remote Repairing Battle Ships

A RRBS preview will be presented in next months issue, discussing basic fits for all races and some tactics normally used.

### Tanking DPS

An old guide available at [Allabouteveonline-Tanking Guide](#) (pdf format).

### Megathron

Putting the PEWPEW into Battleship PVP!

One of the highest damage dealers in the class and at close range a formidable machine to overcome. It can also use missile launchers (2 launchers possible), an unusual step by the Gallente Federation.

The Megathron comes with the following bonuses:

5% bonus to large hybrid damage per level

7.5% bonus to large hybrid tracking per level

Normal PVP fit would be:

8 High Slots: 7 Hybrid guns and a Heavy Energy Neutralizer.

4 Med Slots: MWD, Warp Disruptor, Cap Booster and Stasis Webifier.

7 Low slots: A formidable armour repair tank

3 Rigs slots: Tri-Mark armour rigs.

### [Megathron \(Eve-wiki\) information](#)

The Megatron is the Gallente preferred Remote Repping Battle Ship (RRBS), easily reaching ranges of 150km and providing a huge armour buffer. To give an example of what it can do, here's the numbers for an RRBS Blasterthron :

High slots : 6 Neutron Blaster Cannon II with Antimatter Charge, 1 Large Remote Armour Rep, 1 Large Energy Transfer Array.

Mid slots : Micro Warp Drive, ECCM - Magnetometric II, 2x Cap Recharger II

Low slots : 2x Energized Adaptive Nano Membrane II, 1x Damage Control II, 2x 1600mm Reinforced Steel Plate II, 2x Magnetic Field Stabilizer II

Rigs : 3x Trimark

(note - this fit is very tight on cpu, so capsuleers will need to dial back on some of the Tech II, fitting named items to make the fit work)

With Level V skills, the fit has 121k effective HP which mostly comes from a tuff as nailz 28594 armour hp. The lowest armour resistance is explosive at 55% but unless it's a Minmatar throwing Fusion ammo at it or a Caldari throwing missiles, not much is going to be targeting that resist. Oh, if anything gets close enough (4.5km optimal plus 13km fall off), it can do 604 dps before Drones.

Nasty.

*(Keela-ed : warning, there's a little spell of heavy Geekdom coming ...)*

But what does the Megathron bonus bring to the party ? Let's compare chance to hit with and without the tracking boost. We'll look at four targets :

That annoying little Rifter warp disrupting from 10km away  
A Nano-Cane going 250m/s from 7km away (he's tougher and less scared)  
The Nano-Cane got too close, so he turned on the MWD to take him to 1600m/s at 10km.  
The Mega itself orbiting at almost top speed (100m/s) at 10km.  
With Gallente BS V, turret tracking is 0.07442 radians/sec, without it goes down to 0.05412.

Rifter - no chance of hitting still, the signature radius is just too low for the Battleship guns to hit. Send in the Drones !

Nano-Cane in tight - 67% to hit with bonus, 49% to hit without bonus

Nano-Cane zooming out of web range - 71% to hit with bonus, 59% without bonus  
(even though a MWD makes you go faster, the increase in signature radius makes it far easier to shoot you)

Enemy Megathron - with the tracking bonus the hit chance is 86%, without it goes down to 85%.

What does that tell us ? The bonus doesn't help against little ships or big ships but anything cruiser or battlecruiser size is in Big Trouble against a skilled Mega pilot. That Nano-Cane pilot in tight would have about a minute of life up against the Blasterthron, less if they turn on the Micro Warp Drive.

*(Keela-ed : I'm done ! Non-geeks can open their eyes again !)*

## Harbinger

Putting the PEWPEW into Battlecruiser PVP!

As well as applying a bonus of "straight to level V Evil Grin" (it's in Social - I checked).

The Harbinger comes with the following bonuses:  
5% bonus in laser damage per level  
10% reduction in laser capacitor need per level  
99% reduction in the CPU need of Warfare Link modules

Normal PVP fit would be:

8 High Slots: 7 Lasers and a Medium Energy Neutralizer.  
4 Med Slots: MWD, Warp Disruptor, Cap Booster and Stasis Webifier.  
6 Low slots: A formidable armour repair tank  
3 Rigs slots: Tri-Mark armour rigs.

That will let a skilled pilot hit harder and hit for longer, a combination that should warm the heart of any capsuleer. Let's have a look at a few fits, courtesy of Evemon's link up with Battleclinic :

Kravotir's PvP Harbinger : (this is the one in Evemon with the highest positive rating)

8 High slots : Guns ! In the form of Focused Medium Pulse Lasers. Fill the last slot with a medium neutraliser (might be worth looking at NOS - turn their cap into power for your lasers)

4 Medium slots : Don't let 'em get away ! Pounce on them with a microwarpdrive and pin them in place with webber and disruptor. Kravotir uses the 4th slot for a Capacitor booster

6 Low slots : Energized and non-energized Adaptive Nano Plating, Damage Control II, 1600mm plate and 2 heat sinks

Rigs : Medium Trimarks

Comments - 620 dps (level V with drones and Navy ammo) will turn that Evil Grin Level V into Maniacal Grin Level I. (MG Level V is reserved for Nightmare pilots). The capacitor booster gives more capacitor endurance. However, the fitting is very tight, hence a mix of Energized and normal adaptive nano plating. Still, 72k effective hp ain't bad !

[Harbinger \(Eve-Wiki\) information](#)

So Amarrians, go forth ! Bring the Holy Amarr Light to the heathen and Purge those Heretics! This is your tool.

*(Keela's ancestors - What are you saying ?!? Call yourself Minmatar?)*

And we couldn't leave this one without a few quotes from SOMETIMES describing what he thinks of the Harbinger : "Mother of all dps" and "Godlike"

### **Ship Fits**

For specific fits, you can access the Volition cult [eFD](#) tool, where various ship fits are available for review.

---

### **Fail Ship Fits**

The following fit/s are those recently encountered by 'Volition Cult' pilots, and overcome!

A Drake fan taking things a little too far ... VoV's only regret is that we weren't around to help with the mercy killing.

[Chimera \(6th June\)](#)

The Care of Bear Police Skiff squadron caught up to someone guilty of spacing teddy bears :

[Crow \(2010-04-17 19:36\)](#)

Yes, that is a Skiff as highest damage dealer.

The fit that doesn't deserve to be called a fit.

## **PVP Improvement - Tips**

### **Empire Wars - What to do?**

SMASH & Grab Alliance and Privateer Alliance recently declared war upon The Volition Cult; current statistics of the war against PVTR alliance available at: [PVTR Kill Board](#)

To be at war requires pilots to act differently; the VOLT forum topic [PVTR War - Notice](#) can be reviewed to keep abreast with the latest issues and tips to evade ship destruction.

Wars can get you down but we in Volt are never down for long. We take stock, we measure our enemies, we gather our resources. We welcome back old friends, we conspire with new allies.

We prepare ... A Cunning Plan\* ! Watch out Privateers.

\*(wouldn't be a Cunning Plan if we revealed it early!)

### **Gangs & Tactics - What to consider?**

One of our Land lords members produced the following at some time in the past, which will assist budding Fleet Commanders: [ATLAS Fleet Guide](#)

Also of use will be information provided at [Military Tactics Website \(Eve-wiki\)](#)
